

- **EcoVerde** designs and manufactures best in class odor control equipment with the lowest total cost of ownership, shortest delivery times and longest warranties in the industry. Our systems treat airstreams ranging from passive to hundreds of thousands of cfm.
- Our modular, all-in-one bioscrubbers are an eco-friendly solution that requires no use of harmful and costly chemicals.
  - Next-generation EG-bioscrubbers have demonstrated better removal rates, at higher loading rates, and have the lowest pressure drop in the industry.
- EG-Bioscrubbers incorporate a self-sustainable synthetic media that comes with a standard 15-year warranty.

- EG-Bioscrubbers average 30 minutes per week for operation and maintenance.
  - EG-Bioscrubbers can be delivered pre-assembled for fast, easy installation.
  - **EcoVerde's** EG-T (dual-stage) for total odor control offers a polishing media stage that is designed for high humidity environments for long lasting media with immediate removals.
- Take advantage of our free demo program and discover how one of our powerful biological solutions will solve your odor problems. The demo includes start-up services, training, H<sub>2</sub>S monitoring and a full report. You have nothing to lose other than your odor problem.

ecoververde

The EG-systems are designed for each application. Our EG-systems are designed with the appropriate Empty Bed Residence Time for long-term performance with extremely low operating costs.

## Biological Odor Control

## Wet/Chemical and Degasifiers

Ecoverde offers a complete line of packed-bed wet/chemical scrubbers and degasifiers to remove soluble contaminants. Particulate or gases are collected in the scrubbing liquid and recirculated over corrosion resistant media.

- Municipal Applications
- Industrial Applications
- Vertical or Horizontal Scrubbers
- Single-Dual stage design
- Efficiencies greater than 99.5% removals

- Catalytic
- Impregnated
- Virgin
- Potassium Permanganate
- Water-Washable
- Media Options (Wood, Coal or Coconut):

Whether used as a polisher or as the main odor control option, our EG-Carbon systems are designed to remove all odors by choosing the right media blend for your application.

## Dry (Carbon) Media Odor Control

## Accessories

Ecoverde manufactures a complete range of accessories for odor control, water and wastewater treatment in Fiberglass Reinforced Plastic (FRP), High Density Polyethylene (HDPE) and Polypropylene (PP).

- Remote monitoring
- Demister/Grease Filter housings
- Damper Valves
- Ductwork
- Covers and hoods
- Chemical Storage Tanks
- Stacks
- Blowers
